

K-Love radio station is an important part of the life of my family. We get inspiration , encouragement, answers to life's problems, and wonderful music from listening to the station. It has influenced many people's lives causing them to find new life in Jesus. The station has a positive effect on the community helping people to reach out to each other and to God. It would be a great loss if the station were not there. I believe that the message brought by K-Love has saved lives, has changed lives, has renewed lives, and made many communities stronger, better places to live. Our country has in many ways turned its back on God, and we need the influence of K-Love to help us return to the One who created us.

The future of this country depends on it.
